## Who is it for?

This training course is for dogs of all ages and breeds. It is designed for dog owners who are looking to take their dog training and communication skills to the next level.

No prior training experience is required, this is for beginners and intermediates.

Attendees will need to commit to a minimum of 15-minutes of training practice with their dog, five days a week, throughout the course duration to make full use of these classes.

This course is not suitable for dogs who are reactive to or fearful of other dogs.

## What is it for?

Unlike standard dog training classes, this course goes beyond basic obedience training and focuses on advanced training methods and communication strategies that will help you better understand your dog's behavior and respond to their needs.

This course focuses on how to teach behaviours you can rely on in every environment. During the course, we will build up two strong behaviours and proof them for the real world, then discuss how to apply this methodology successfully to any future behaviours.

Whether you want to teach your dog new tricks, shape behaviours to make your life easier, or simply strengthen your relationship with your pet, this course is for you.

All training is done using the most up to date positive science-based methods.

## What's included?

- Course Workbook
- 'Rewiring Your Dog's Brain' 1 & 2
- Attendee Whatsapp Support Group
